Technical Skills

- Languages: React, Javascript, HTML, CSS, Typescript, Jest
- Tools and Technologies: Next js, Json, Git, InVision, Wordpress

Experience

Galactic Threads   April 2023 - Current

- Currently maintaining the website with the React Framework, Next js and Typescript.

- Worked with a team to develop and design an E-commerce website featuring A.I. generated space themed merchandise, in an Agile development cycle.

- Designed and Developed multiple pages, and followed the practice of Test Driven Development.

Appliance Remedy (Contract)   May 2022 - August 2022

ApplianceRemedy.com

- Worked with a team to build, design and test a website for an Appliance Repair Company using a Lean development cycle.

- Built with the React Framework, Jest and Typescript ,while using the DRY principle.

- Completion of the website allowing it to be found in SERPS, saw a 64% increase in contracts for the client.

Bald Ridge Lodge (Volunteer)   October 2020 - February 2021

Baldridgelodge.org

- Worked with a team to build a redesign of a website for a non-profit boys home.

- Collaborated with the organization and a designer to build a website in their vision using Wordpress, HTML and CSS.

Projects

Duel Blog   March 2021 - November 2021

- Developed and Designed a blog like website for a friend using the React Framework, styled with CSS to the "clients" vision.

- The website features a blog section as well as a decklist section, that was made with JSON to showcase the clients decks used in the online game Yugi-oh! Master Duel.

- Inserted links to all the "clients" social media, as well as integrated the "clients" Twitch stream on the front page.

Portfolio Site

- Built with Next Js and Typescript.
- Designed and styled with CSS.
